

EDUCATIONAL DAY - MAY 2/09

Integrative Approaches to Treatment of Autism Spectrum Disorders

A group of experienced Professionals have joined together for a day of lectures, discussions, and answers about integrating approaches in ASD treatments.

Improving quality of life and possible recovery of children with Autism can be achieved through combining a variety of treatments. This one-day seminar answers questions on integrating traditional treatments with “alternative” complementary therapies through a Multi-Treatment model.

This not-for-profit event brings together the following presenters:
